HYP 2017-18
Project Instructions - Part 1.3: Usability Evaluation

This activity consists in performing the usability evaluation of the prototype created using Front-End technology

The usability evaluation method to be used is User Testing

Workflow
*   Design the User Testing (see slides)
*   Execute the test involving at least **5 users**
*   Report the study results

What to report and deliver
The deliverable of this part of the exam consists of a **Usability Study Report** that includes the following sections:
1. *Cover:* Title + Group members with names and email + Delivery date + *Abstract (*3-5 lines that describe what the document is about)
2. *Design and execution of the study*
        This section describes (shortly)
    *   the evaluation method adopted, i.e., user testing
    *   the scenarios defined for the test
    *   the profile and number of participants and how they were recruited
    *   usability variables to be measured
    *   variables how the test was performed: **tasks** assigned to the user, where the test was performed, **how data were collected**
3. *Results* (including tables of the collected data, aggregated data e.g. mean values for the various measures, diagrams, etc.)
4. *Discussion of results (comments about the results, and suggestions for improvements and re-design)*

Where and when to deliver
ALL required material must be delivered on **Beep** on the official exam date **or** by the intermediate delivery date set during the course (May 9)

Learning resources

*   Slides on usability
*   ID book chapters: 12, 14, 15, 7 and 8 http://www.id-book.com/secondedition/
*   Hartson, P. S. Pyla, The UX Book, Morgan Kaufman, 2012 Chapters 12-13-14-15-16-17 http://www.theuxbook.net/
